

The **GenTex**[™] Advantage OILFIELD MANUFACTURING INC

Understanding our customer needs and industry needs is the key to the GenTex[™] Advantage.

Having had a service company operating this type of equipment from 1968 to 2002, as well as our acquisition of the Texsteam Heating Division from Houston, Texas, is a great advantage for GenTex[™] customers. We have a strong research and development team supplying our customers with up to date technology and equipment. Our clients know that everything we manufacture has been tested and proven. We can also give our clients a "hands-on" demonstration of these units as well as technical and logistical support.

• A variety of different applications

• Proven performance in all climates & conditions

The Service You Expect From A Company You Can Depend On!

domestic & international market.*

Discover The Advantage

*Proud to draw on over 75 years of
combined knowledge & experience
in the Oil & Gas Industry.*

www.gentex.ca

Heating and Pumping Equipment have many applications:

- Pumping fluids at high pressure
- Circulating / killing wells
- Pressure testing
- Testing tubing & pipelines
- Hot oiling well bores (paraffin removal)
- Heating & circulating oil & gas processing facilities
- Heating water, oil or frac fluids

• Our state-of-the-art facility in the heart of the energy industry

Operating out of our 15,000 sq ft shop on 5 acres, we are the only company in Canada that can design and fabricate a hot oil unit - THEN provide on-site training.

On a world-wide level, the industry is seeing the advantage of GenTex™ Oilfield Manufacturing. Our equipment can be found in:

- | | | |
|------------|--------------|----------------|
| • Brazil | • Germany | • Mexico |
| • China | • India | • Russia |
| • Colombia | • Indonesia | • Turkmenistan |
| • Gabon | • Kazakhstan | • USA |

The GenTex™ Advantage
OILFIELD MANUFACTURING INC.

The ThermoGen Heater

GenTex® heaters have been tested against our competitors, and it has been continuously proven our heaters and both more efficient, and durable, due to their superior design. Our heaters have proven to be continuously 10-15% more efficient than our Canadian competitors and as high as 25% more efficient than heaters manufactured by our American competitors.

TEXHEATER®

With the volatility of fuel prices and increasing environmental standards, our heaters provide our customers with substantial advantages:

- higher efficiency
- less fuel consumption
- lower emissions
- reduced weight & size
- lower purchase price
- a selection of 25M, 35M, 50M & 70M Btu models

TEX-STEAMER®

TEX-STEAMER® is an oil fired, forced circulation, packaged, automatic steamer that develops full, dry steam in three minutes from a cold start. All sizes can be truck, trailer, or skid mounted.

- Maximum Pressure 300 PSI
- Sizes from 1.3 to 4.1 million Btu/Hr

• GH-600 Hot Oil Unit

• GP-60 Pressure Truck

• GP-400 Pump / Kill Unit

• GT-70 Heating Unit
